

Problem #2

You are the Project Supervisor for the Nature Conservancy. You have \$1Billion (an amount designed to take the concern about cost out of this problem) available to purchase land to provide refuge for the endangered golden cheeked warbler in Texas. Describe what lands you would attempt to purchase and why? Of particular concern here would be: golden cheeked warbler habitat needs; current habitat; current refugia; and refuge design considerations. You can re-make the map below to any scale you decide. Draw and describe what your rationale was for the choice(s) you made.

Space to write your description and rationale for your choice(s).
